

Silverthorne Lane, Bristol

Employment, learning and research

Concept site plan

University of Bristol

The Silverthorne Lane masterplan begins with a new and exciting university building on plot 1. This expands on the Temple Quarter Enterprise Campus adjacent to Bristol Temple Meads station.

The University of Bristol will provide a key presence in this prominent position and provides employment, learning and research facilities to allow variation and mixed uses across the masterplan.

An innovative academic building will provide the welcoming face to the overall development.

A cafe and other shared facilities will provide a catalyst for sharing ideas and mixing of public and academic users.

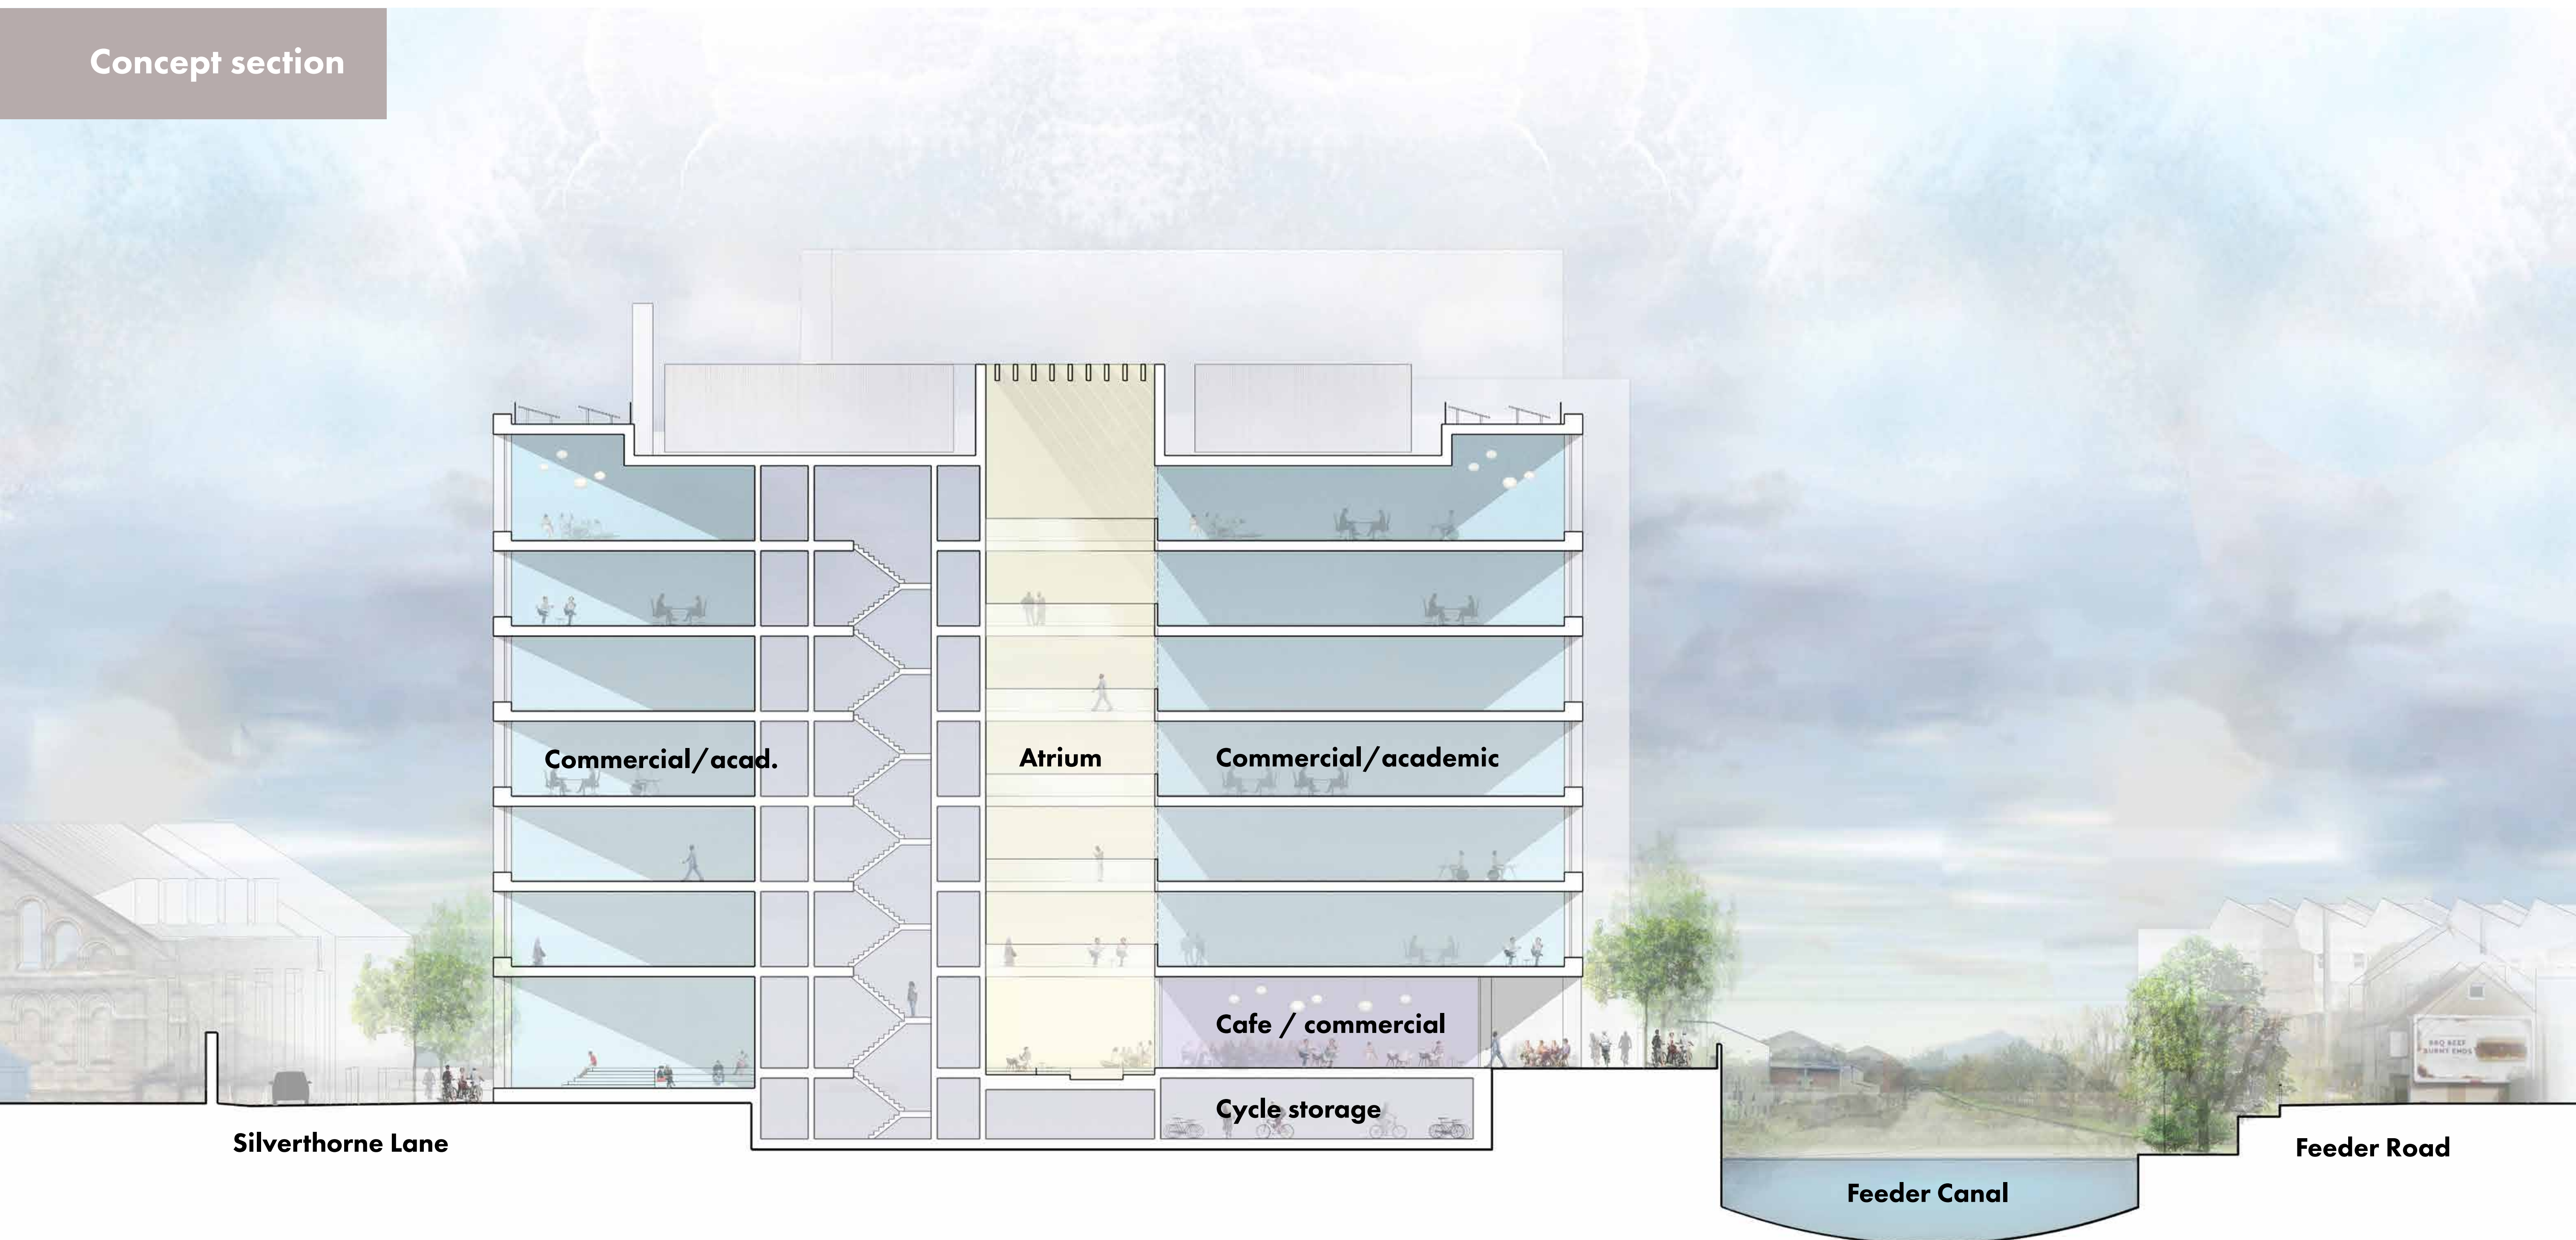

The generous landscape offers an inviting south-facing terrace with river views and links through to the adjacent plot.

The existing wildlife corridor along the Feeder Canal will be enhanced and expanded by a high quality landscape design.
